

Majority of Canadians support protecting more land and sea in Canada; about eight in ten say it is important for Canadian governments to speed up progress on nature protection.

The purpose of the research was to gauge the opinions of Canadians on conservations and protected areas both within their province/territory as well as nationally. The research included questions on their level of support for increasing the proportion of protected areas, increasing government funding for protected areas, as well as drivers of support for political parties that took various nature protection actions.

Nanos conducted an online representative survey with an RDD random telephone oversample in the territories of 2133 Canadians, 18 years of age or older, between September 23rd to October 5th, 2022. The survey also included oversamples in Alberta, Saskatchewan and Manitoba.

The research was commissioned by Canadian Parks and Wilderness Society (CPAWS) and was conducted by Nanos Research.

Key Findings

MAJORITY OF CANADIANS SUPPORT COMMITTING TO PROTECTING MORE LAND AND SEA IN CANADA AND INCREASED SPENDING TO MEET COMMITMENTS

A strong majority of Canadians (ranging from more than eight in ten to just over nine in ten) support or somewhat support further commitments to protecting land in Canada, including the government’s commitment to increasing protected land and sea to at least 30% in Canada and increasing spending to meet these commitments. Additionally, three in four Canadians support increased spending to meet these commitments both on land and in sea.

STRONG SUPPORT AMONG CANADIANS FOR CREATING MORE IPCAS IN CANADA

More than eight in ten Canadians support (52%) or somewhat support (30%) the creation of more Indigenous Protected and Conserved Areas in Canada as a means of protecting more lands and sea. Residents of the Territories have a higher intensity of support (62%) compared to the rest of Canada.

MORE THAN THREE IN FOUR CANADIANS SAY IT IS IMPORTANT FOR CANADIAN GOVERNMENTS TO SPEED UP PROGRESS ON NATURE PROTECTION

Eight in ten Canadians say it is important for Canada and its provinces and territories to speed up progress and make strong commitments to protecting nature (78%)(mean of 7.9) and just over half think Canada should aim to be ahead of other major economies on this (53%; 36% say at about the same pace).

Key Findings

MAJORITY OF CANADIANS WOULD BE MORE LIKELY TO SUPPORT A FEDERAL PARTY OR PROVINCIAL/TERRITORIAL GOVERNMENT THAT COMMITTED TO NATURE PROTECTION

A majority of Canadians, from just under seven in ten to over seven in ten (69% to 74%), would be more likely or somewhat more likely to vote for a federal party that proposed various nature protection policies. A majority of Canadians agree (69%) they would be more likely to support a provincial or territorial government if it set out a big and important nature conservation goal.

CANADIANS THINK ABOUT HALF OF THE WORLD'S LAND (48%) AND SEA (55%) AND HALF OF CANADA'S LAND (49%) AND SEA (55%) SHOULD BE PROTECTED

On average, when asked about the proportion of both Canada and the planet as a whole that should be protected, Canadians feel that over half of the world's and Canada's sea areas should be protected (mean of 55% each) and more than four in ten of the world's and Canada's land should be protected (mean of 48% for the world; 49% for Canada).

MAJORITY OF CANADIANS AGREE THAT PROTECTED AREAS PLAY AN IMPORTANT ROLE IN ADDRESSING CLIMATE CHANGE, AND SUPPORT A HEALTHY, SUSTAINABLE ECONOMY

Around nine in ten Canadians agree or somewhat agree with a variety of statements about protected areas, including that they play an important role in addressing climate change (85%), and support a healthy sustainable economy (83%).

Most important reason for having protected land

Q What do you personally think is the most important reason for having protected areas on LAND? [OPEN]

“ Asked the most important reason for them personally to have protected areas on land, Canadians most often mention protecting wildlife and biodiversity (46%). Twelve per cent mentioned protecting the planet and reducing the impact of climate change, followed by for future generations (10%). ”

	Frequency (n=2054)
Protecting wildlife/biodiversity	45.9%
Protecting the planet/reducing the impact of climate change with ecological services (11.5%)	11.5%
For future generations (9.7%)	9.7%
Protecting the land from human exploitation/development/urban sprawl (8.7%)	8.7%
Preserving natural beauty/green spaces to enjoy (8.5%)	8.5%
Clean air/water	3.3%
Preserving history/culture	3.2%
Unsure	3.9%

Source: Nanos Research, online representative survey with an RDD telephone survey oversample in the Territories, September 23rd to October 5th, 2022, n=2054 Canadians.

Most important reason for having protected sea

What do you personally think is the most important reason for having protected areas in the SEA? [OPEN]

Frequency
(n=2054)

To protect ecosystem/ the environment/sea and amount of marine life	43.7%
To prevent extinction of species/To protect endangered species/repopulation	7.8%
Conservation/preservation/ sustainability	6.2%
Clean water/water protection	5.2%
Prevent overfishing/commercial fishing damage	4.5%
Balanced ecosystems/ biodiversity	4.4%
To reduce or protect against pollution/litter	4.3%
Unsure	5.6%

More than four in ten Canadians say they personally think the most important reason for having protected areas in the sea is to protect the ecosystem, the environment and the sea (44%). Eight per cent to prevent extinction and protect endangered species, followed by conservation and preservation (six per cent) and clean water and water protection (five per cent).

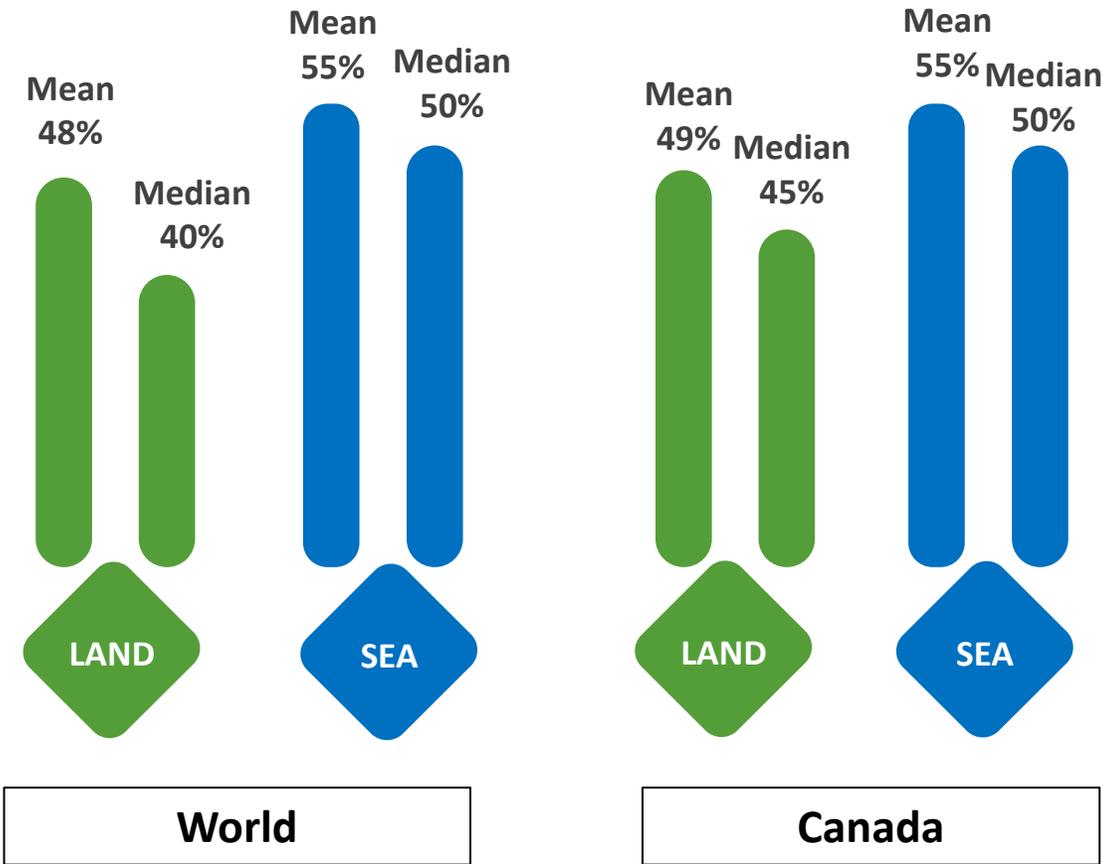

Proportion of the world's and Canada's sea and land that should be protected

What proportion of both Canada and the planet as a whole do you think should be protected? Land' is defined as 'terrestrial and inland water areas' and 'sea' as 'marine and coastal areas'.

Proportion of the World's LAND that should be protected: ____%
Proportion of the World's SEA that should be protected: ____%
Proportion of Canada's LAND that should be protected: ____%
Proportion of Canada's SEA that should be protected: ____%

“ Overall Canadians feel more sea areas should be protected than land, saying on average that more than half of the world's and Canada's sea areas should be protected, and feel close to half of the land areas in the world and Canada should be protected. ”

Source: Nanos Research, online representative survey with an RDD telephone survey oversample in the Territories, September 23rd to October 5th, 2022, n=2133 Canadians.

Top two ways to fund the cost of designating and managing protected areas

“

Canadians rank government funding first as the top way to fund the cost of designating and managing protected areas, followed by fees for commercial operators using protected areas, and fees for entry and use of the protected area.

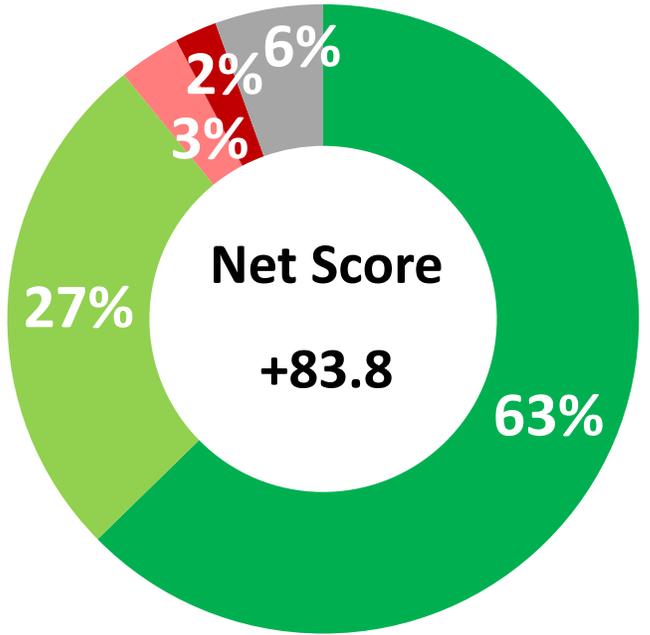

”

Q

Please rank the top two ways to fund the cost of designating and managing protected areas, where one is the best way to fund and two the second-best way to fund the cost of designating and managing protected areas. [RANDOMIZE]

	Rank 1 (n=2133)	Rank 2 (n=1989)
Government funding	31.2%	14.0%
Fees for commercial operators using protected areas (e.g. hotels)	16.2%	15.5%
Fees for entry and use of the protected area (e.g. tourism or recreation)	14.0%	20.1%
Fees for consumptive use of wildlife (e.g. hunting licenses)	11.7%	17.7%
Payments for environmental services provided by the protected area (e.g. water supply, carbon storage)	8.4%	13.6%
Private sponsorship	5.3%	8.8%
Voluntary contributions from the public	4.9%	7.5%
Another reason	0.9%	0.8%
Unsure	7.4%	1.9%

Support of the goal of increasing protected land to at least 30%

- Support
- Somewhat support

What should be stopped to help protect marine areas

Q

What should be stopped to help protect marine areas? (select all that apply)

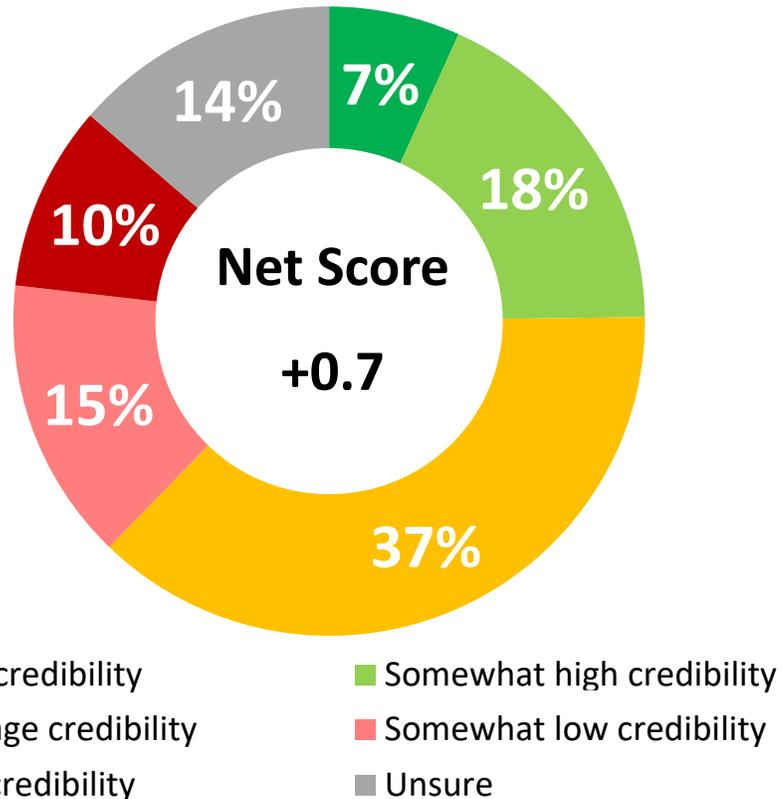

“

The most selected answers of activities Canadians feel should be stopped to help protect marine areas are the dumping of chemicals or waste, oil and gas activities and bottom trawl fisheries.

Source: Nanos Research, online representative survey with an RDD telephone survey oversample in the Territories, September 23rd to October 5th, 2022, n=2133 Canadians

On behalf of CPAWS, Nanos conducted a mixed methodology survey of 2113 Canadians including an online representative survey of 2026 Canadians drawn from a panel, with oversamples in Alberta, Saskatchewan and Manitoba, and an RDD dual frame (land- and cell-lines) random telephone oversample of 107 residents of the territories, between September 23rd and October 5th, 2022. Interviews were conducted in English and French.

Results were weighted to their true population proportionate by geography.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 107 residents of the Territories is ± 9.5 percentage points, 19 times out of 20.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	CPAWS	Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure.
Population and Final Sample Size	2133 Canadians drawn from a panel	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Prodege (online), Dynata (telephone)	Excluded Demographics	Individuals younger than 18 years old; individuals without internet access could not participate.
Type of Sample	Representative non-probability	Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada, Manitoba, Saskatchewan, Alberta and the territories were marginally oversampled to allow for a minimum regional sample.
Margin of Error	No margin of error applies to this research.	Estimated Response Rate	Not applicable for the online portion 4% in the Territories for the telephone portion
Mode of Survey	Online survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	Non-probability.	Question Content	All questions asked are contained in the report.
Demographics (Captured)	Canada; Men and Women; 18 years or older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Demographics (Other)	Age, gender, education, income	Research/Data Collection Supplier	Nanos Research
Field Dates	September 23 rd to October 5 th ,2022	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

NANOS RUTHERFORD MCKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

NRM is an affiliate of Nanos Research and Rutherford McKay Associates. Our service offerings are based on decades of professional experience and extensive research and include public acceptance and engagement, communications audits, and narrative development. www.nrmpublicaffairs.com

Nanos services

- ✓ As premier market and public opinion research firms, we conduct research around the world for a variety of clients.
- ✓ Nanos offers a full suite of services ranging from bespoke research engagements to strategic assessments and mission planning. Our firm applies the latest machine learning algorithms to deliver exceptionally rigorous and insightful intelligence to clients.
- ✓ At Nanos, we believe that small steps can lead to large insights. We'll sit down with you to learn about your challenges and work on them together.
- ✓ For more information about how we can help, please visit us at:
www.nanos.co

Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to exceed the highest standards.

Since

1987

top executives have turned to Nanos for world-class data and strategic insight.

2022-2220 – Canadian Parks and Wilderness Society (CPAWS) – National Survey – STAT SHEET

The following questions are on nature conservation and protected areas in Canada. Protected areas are areas on land or at sea which receive recognised protection from the government or another official organisation due to their natural, ecological or cultural value. Examples would include national parks, provincial or territorial parks, and nature reserves.

		Region										Gender			Age		
		Canada 2022-10	Atlantic	Quebec	Ontario	Manitoba	Saskatchewan	Alberta	British Columbia	Territories	Male	Female	Other	18 to 34	35 to 54	55 plus	
Question 1 - What do you personally think is the most important reason for having protected areas on LAND? [OPEN]	Total	Unwgt N	2054	195	437	533	147	141	201	294	106	1007	1038	9	501	886	667
